

Report title

Your name, name of your supervisor(s), name of their team/lab

Date

This summary should be at most one (two-sided) page.

General context

What is the report about? Where does the problem come from? What is the state of the art in that area?

Research problem

What specific question(s) have you studied? What motivates the question? What are its applications/consequences? Is it a new problem? Why did you choose this problem?

Your contribution

What is your answer to the research problem?

Please remain at a high level; technical details should be given in the main body of the report. Pay special attention to the description of the *scientific* approach.

Arguments supporting its validity

What is the evidence that your solution is a good solution? (Experiments? Proofs?)

Comment on the robustness of your solution : does it rely on assumptions, and if so, to what extent?

Summary and future work

What did you contribute to the area? What comes next? What is a good *next* step or question?
